

How the plan adapts

Inputs

Strava runs, profile, goal, food logs, coach chat

Training model

Fitness and fatigue from heart-rate load

Fuel engine

Calories and carbs follow load; protein steady

Today

Workout, targets, fueling

Re-plan when

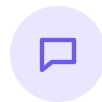

A workout differs

Recompute today, shift the next hard day

Intake is off

Partial top-up before the next key session

You tell the coach

Injury, travel, sickness: it proposes changes, you approve

Each week

Update zones, paces and baseline

Train for it. Eat for it.

Fuel that adjusts to every run you do.

SATURDAY, OCT 3

Coach

Morning! Long run today · [16] mi in zone 2.
How are you feeling?

hey i hurt my knee, can't work out
today or the next three days. pls
update my training plan

Sorry about the knee. Here's what I'd
change:

Sat ~~Long run 16 mi~~ → **Rest**

Sun ~~Recovery 4 mi~~ → **Rest**

Tue ~~Intervals~~ → **Rest**

Wed ~~Easy 5 mi~~ → **Easy 3 mi, if pain-free**

Sat ~~Long run 18 mi~~ → **14 mi**

Fuel ~~[3,400] kcal today~~ → **[2,300] · protein
stays [130] g**

Update my plan

If it's swollen, locking or you can't put weight on
it, get it checked by a doctor or physio.

Tell your coach anything

SATURDAY, OCT 3

Coach

hey i hurt my knee, can't work out today or the next three days. pls update my training plan

Plan updated

4 rest days · back Wed with an easy 3 mi

I'll check in Tuesday night to see how the knee feels before we restart.

ok what should i eat today then

Today is a rest day now, so less fuel, same protein:

Calories

[2,300] KCAL

Protein

[130] G

Spread protein across 4 meals and get calcium and vitamin D in. Carbs drop to about [250] g since you're not running.
